IPDET

IPDET aims to provide managers and practitioners in the field of evaluation with the tools required to evaluate policies, programs and projects at local, national, regional, and global levels, as well as to commission, manage and especially use those evaluations for decision-making.

IPDET Outcomes

Networking

- *"The IPDET designed to bring 200 more professionals from across the world. The atmosphere was energetic. It was phenomenal opportunity to build new community ... I came back with lots of new contacts." Amriddin Karakhonov*

Organisational strengthening

- *"With IPDET 2019, I would be able to use better evaluation techniques within my organisation for our internal evaluations as well as inculcate and develop my training modules for evaluations further within the organisation which would also build on research rigor and organisational knowledge." Anamika Dutt*

Design better programs

- *"The knowledge gained by offering this programme will help the Ministry of M&E and our partners to sieve through the rubbles and be able to trace the causal patterns of interventions. This will help us to sustain programme gains whilst on the other hand guide us to reshape challenging programmes." Raymond Mensah*

IPDET Outcomes

Strengthen die Evaluation Community

- *"... I also will join Indonesia Development Evaluation Community to leverage and share my knowledge with other evaluators so we can collaborate to improve evaluation in Indonesia's policies and development programs." Lilipramawanty Kewok Liwin*
- *"...will contribute in a significant manner to the institutionalization of evaluation in Ecuador. Specifically...start new research projects...introduce new techniques...help to increase the orientation of my organization's work towards contributing to development, generate new alliances and collaborative work..." Fernando Cando Ortega*
