What does it mean to be a good neighbour in a world shaped by policies that often fail to serve the people most impacted by them?

Full Abstract [here](#)

Through storytelling, critical reflection, and real-world examples, this recorded c2025 keynote challenges us to move beyond compliance-driven evaluation and toward evaluation as a tool for radical relationship-building and collective care.

Humility, accountability, and a commitment to justice can help us show up as better neighbors, ensuring that our work serves as a foundation for liberation rather than a tool of control.
